

# Breadalbane Biodiversity Linkages

*Fish come and go, but it is the memory of  
afternoons on the stream that endure.*

E. DONNALL THOMAS

## *Rivers of carbon ~ Rivers of life*

Rivers of Carbon – Breadalbane Biodiversity Linkages will work with local landowners to fence and revegetate wetlands and streams to improve water quality, reduce erosion, boost biodiversity and sequester carbon. We achieve win : win outcomes, with incentives provided to support landowners working with us.

The project is part of the broader Rivers of Carbon initiative that is working in the Lachlan, Yass and Murrumbidgee catchments.

### **If you are a landholder and would like to improve the creek or stream on your property ...**
