

Rivers of Carbon community conversation and paddock walk

‘MESS IT UP AND SLOW IT DOWN, PART 2’ — SATURDAY 29 APRIL

Following such a great response to our ‘Mess it up and slow it down’ workshop in Goulburn last October, we are delighted that Margie Fitzpatrick has invited the Rivers of Carbon community to her beautiful property ‘Australind’, to see the range of ways she has ‘messed it up and slowed water down’.

Along with us will be our friend Professor Ross Thompson who will talk about the range of benefits, particularly carbon sequestration, that we can gain when we look after our ‘wet areas’ as integrated parts of our farm. Lori, Haydn, Mary and Siwan from the Rivers of Carbon team will also be there for you to catch up with.

This event is also celebrating the completion of our six year Australian Government supported Biodiversity Fund grant that has enabled us to work with 66 landholders to revegetate 887 hectares of land, plant 97,000 trees, use 36.7 kilograms of seed, and fence 122 kilometres of riparian zone. Please come along and join the Rivers of Carbon team for this special event. Cappuccino, cake and a BBQ lunch will be provided.

Date: Saturday 29 April

Time: 10.00 am to 1.30 pm

Location: ‘Australind’, near Goulburn (address provided when you register)

This event is free, but bookings are essential, go to the Rivers of Carbon website — riversofcarbon.org.au and follow the links to our Eventbrite page.
