

## Burra banks, bush and biodiversity

The background of the slide is a photograph of a natural landscape. In the foreground, there is a small, calm body of water, possibly a stream or a pond, surrounded by lush green grass and reeds. The middle ground shows a grassy bank with several trees, including a prominent, large, spreading tree. The background is a clear blue sky with a few wispy clouds. The overall scene is bright and sunny, suggesting a healthy, natural environment.

*We must begin thinking like a river if we are to leave  
a legacy of beauty and life for future generations.*

DAVID BROWER

## *Burra banks, bush and biodiversity*

We are delighted to have funding through the New South Wales Environmental Trust to work with the Burra community to reduce soil loss, restore riverbanks with native vegetation, and link wildlife habitat.

In partnership with the Molonglo Catchment Group, Greening Australia, South East Local Land Services and landholders, we will work to connect the Tinderry and Namadgi Nature Reserve areas along the river corridor, providing multiple environmental and social benefits.

The logo for Rivers of Carbon (ROC) features the letters 'R' and 'C' in a large, white, sans-serif font. Between the two letters are three concentric circles with arrows pointing outwards from the center, symbolizing carbon cycles or restoration.
