

Rivers of Carbon – Source Water  
can assist with:

- Fencing (\$6/metre)
- Trees and shrubs
- Minor erosion control
- Alternative water for stock

## Would you like to join Rivers of Carbon?

### EXPRESSIONS OF INTEREST ARE NOW OPEN FOR LANDHOLDERS IN SYDNEY WATER CATCHMENTS

#### What is Rivers of Carbon?

Rivers of Carbon is a 'people program' that builds on years of scientific research into how river and riparian zones function, combined with landholder experience and practical management solutions. We work with landholders who want to protect and restore rivers, creeks, billabongs and wetlands on their property, so that multiple benefits can be gained for both the environment and on-farm productivity.

The great news is that Rivers of Carbon has been funded to work with interested landholders in Sydney Water catchments. Rivers of Carbon is managed by the not-for-profit Australian River Restoration Centre in partnership with Greening Australia and local Landcare groups. Our work in the Sydney Water area is being funded by Water New South Wales to protect the drinking water catchments of Sydney and surrounds.

#### What does Rivers of Carbon offer?

We will visit your property and work with you to develop a plan for your riparian area that may involve fencing, small-scale erosion works, weed removal and revegetation. Once we agree with you about what you want to achieve, and it fits within our Rivers of Carbon objectives, we will bring it together in a 10-year Greening Australia Management Agreement that both parties sign. These Agreements are straight forward, common sense and easy to follow. We will then assist you in planning and undertaking the works. We generally cover at least half of the costs involved in implementing the Management Agreement, with the landholder also contributing cash and in-kind support.

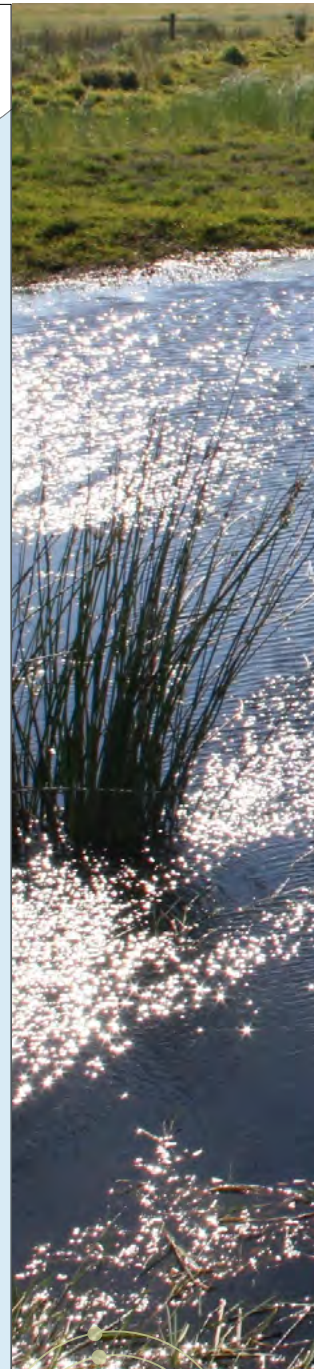

A PARTNERSHIP BETWEEN THE AUSTRALIAN RIVER RESTORATION CENTRE, GREENING AUSTRALIA AND WATERNSW

## Yes, I want to get involved?

Terrific, we would be delighted to hear from you. What you need to do now is to check the map to ensure you are within the Sydney Water catchment. If you are, complete the Expression of Interest form and send it to Ben Hanrahan who will be the main contact for this project. You can complete it on-line or print it out, scan it and send it back to Ben.

To access the Expression of Interest form visit the Rivers of Carbon website and follow the link on the home page. If you don't have access to the internet or email, give Ben a call (details below) and he can post you a form. Or just give him a call about what you are hoping to achieve on your place by working with us.
